SR CLOUD DEVOPS ARCHITECT & MANAGER

Passionately committed to continuous learning and staying updated on new technologies. A determined and collaborative professional, I thrive in team environments, contributing expertise for collective success.

EDUCATION

MASTER CYBERSECURITY
2022

HIGHER DEGREE INFORMATICS
2015-2017

DEGREE TECH SYSTEM ADMINISTRATION
2013-2015

IT STEP - INTERNSHIP
BRATISLAVA 2017

SKILLS

- Docker
- Kubernetes
- Openshift
- Linux
- AWS/AZURE
- Automatization
- Team Leading

QUALITIES

Strategic problem-solving
Leadership and cross-functional collaboration
Cloud-native and automation mindset
Ownership and operational excellence

ABOUT ME

Expert in Cloud Systems Administration, Project Management, Process Automation, SaaS Security, and Virtualization.

WORK EXPERIENCE

EBCONT - BARCELONA - WIEN DevOps Eng. 2017 - 2019

- Cloud infrastructure design with IaaC tools such as terraform, ansible and cloudformation in AWS and Azure.
- Pipeline automation.
- Creation of environments from scratch with Kubernetes and Openshift (EKS, ARO and ROSA).
- Securing infrastructure on **Azure and AWS**.
- Kubernetes debugging and implementation ServiceMesh.
- Deploying applications in EKS and ECS with integrated monitoring for microservices.
- Support B2B clients to be able to create escalation processes to improve performance and save costs.
- Billing AWS admin accounts and organization responsibilities
- CTO reports and Infrastructure architecture strategy driver.
- Clusters creating, maintenance, update and migration plans
- KVM & Vmware.
- Users, Policies and Roles management - IAM.
- Implemented configuration management and automation for legacy infrastructures using Ansible, Chef, and Puppet.
- Networking expert.
- K8S administrator.
- Internal training of new developers to involve them in our internal projects.
- Manages cloud resources in **Azure and AWS**.
- Delivered tailored B2B infrastructure solutions for new enterprise customers and strategic projects.
- Collaborated with cross-functional teams using Agile/Scrum methodologies to deliver scalable cloud-native solutions.
- Managed RBAC, IAM policies, users, and access controls across cloud and containerized environments.
- Managed and secured multi-cloud infrastructures across **Azure** and AWS including governance, IAM policies, and compliance best practices.

VIESURE - WIEN Cloud Devops Eng. 2019 - 2021

- CI/CD Automation (Build & Release) with Jenkins, Gitlab and Bitbucket.
- Infrastructure as code such as Terraform and Ansible. Pipelines Automation and Architecture Design (LLDs).
- Design, implement, and maintain cloud-based infrastructure in **AWS, Azure and GCP.**.
- Creating and managing Kubernetes environments, implementing Kubernetes operators, Service Mesh and integrating CI/CD pipelines aligned with development teams. ArgoCD integration.
- Ensure the stability, security, high availability and scalability of the systems. Scripting in bash and python.
- Monitoring services with 99.95 SLAs.
- Create and maintain Openshift ARO clusters.

ALPEGA GROUP - WIEN Sr. Cloud DevOps & Team Lead. 2021 - 2025

Virtualization & Containerization

- Design, deploy, and manage environments in AWS and on-premise with VMware, KVM, or equivalent hypervisor technologies.
- Integrate containerization platforms (Docker, k8s) with virtualization layers to ensure efficient resource utilization. Manage and optimize multi-tenant virtual infrastructures for performance, security, and cost-effectiveness.

CI/CD Automation & Scripting

- Build, maintain, and optimize CI/CD pipelines using **Github actions, GitLab CI/CD, and Bitbucket Pipelines** for automated build, test, and release processes.

- Led the migration of CI/CD pipelines to Argo CD, achieving a 40% increase in deployment efficiency and reliability in production environments.
- Implement pipeline strategies for both virtualized and containerized application deployments.
- Ensure integration of automated security scans, code quality checks, and compliance gates in the build process.
- Bash, python and Go automation

Infrastructure as Code (IaC)

- Use **Terraform** for provisioning cloud and virtual resources.
- Apply **Ansible** for configuration management, application deployment, and automation of infrastructure changes.f

Cloud & Platform Engineering

- Design, implement, and maintain **cloud-based infrastructure** across public, private, and hybrid clouds.
- Ensure high availability, fault tolerance, and disaster recovery strategies for critical workloads.
  Deploy and maintain **EKS and OpenShift clusters**, ensuring secure multi-tenant usage and integration with CI/CD pipelines. Windows debugging and powershell scripting.
- Maintain and update DevOps/IT procedures and systems in line with the company policy
- DevOps Team Leading

DEVOTEAM - MADRID Principal Devops Eng. - 2026 B2B

- Designed and deployed Kubernetes clusters and scalable microservices architectures in **AWS** cloud environments.
- Built, optimized, and secured CI/CD pipelines using Azure DevOps and GitHub Actions, significantly improving deployment reliability and release automation.
- Implemented pipeline security controls including secrets management, RBAC policies, approval gates, and artifact validation. Integrate Keda, Karpenter, Envoy Gateway in EKS platforms.
- Automated infrastructure provisioning and environment management using Terraform following Infrastructure as Code (IaC) best practices.
- Managed GitOps-based application delivery with ArgoCD, reducing configuration drift and improving deployment consistency across environments.
- Enhanced deployment workflows and rollback strategies, reducing downtime and accelerating delivery cycles for production releases.
- Implemented monitoring, logging, and observability solutions to ensure high availability and proactive alerting.

DEVOTEAM - Remote Principal DevOps Eng.Freelance 2026 - Now

- Lead global cloud migration initiatives using lift-and-shift, rehost, and full re-architecture strategies across Azure and GCP environments.
- Design and maintain scalable multi-tenant architectures, AKS/Kubernetes platforms, and cloud-native microservices infrastructures.
- Build, optimize, and secure CI/CD pipelines using GitHub Actions, Azure DevOps, ArgoCD, and Terraform, improving deployment reliability and operational efficiency.
- Drive automation, observability, security, and Kubernetes management (KMS, RBAC, network policies, secrets management), ensuring hardened and compliant cloud environments.
- Lead infrastructure and platform engineering squads, defining cloud architecture standards, DevOps best practices, and technical roadmaps.
- Design AI-driven workflows and automation agents to streamline engineering operations and improve productivity across the technical organization.
- Ensure compliance with ISO 27001 standards.
- Windows Debugging and integrate pipelines in windows systems.

COURSE / CERTIFICATION / CONFERENCE

2026 - GCP Cloud Engineer & GCP Cloud Architect
2025 - AWS Solutions architect - Internal Austria
2023 – AKS Certification
2022 - Tekton Pipelines Training
2022 - DevOps Conference
2019 – AWS Cloud Practictioner Certification
2018 – AWS SysOps
2018 – Course of Jenkins and Git for DevOps
2018 - Programming Course with Javascript, Ajax and JQuery.
2018 - Certification in cPanel & WHM Proffessional.2018 - Online Certification: Citrix Application and Desktop Virtualization - 7.6
2018 - Course of Dockers and creation of containers
2017 - LE-1 Linux Essentials

TOOLS AND TECHNICAL EXPERIENCE

- Design, architecture, and deployment of projects in **GCP, Azure** and **AWS**
- Windows debugging and troubleshooting skills, including crash dump analysis and system error diagnosis.
- Infrastructure as Code with **Terraform**, **CloudFormation**, and **Ansible**
- Migration of critical legacy systems to **GKE, Azure Kubernetes Service (AKS)** and **OpenShift**
- Incident resolution in collaboration with **GCP, Azure**, **AWS**, and **Red Hat** support
- **IAM** expert in multi-cloud environments
- Monitoring with **Prometheus**, **Icinga, Nagios**, and dashboards in **Grafana**
- Use of **Elasticsearch/OpenSearch** (managed and self-hosted on Kubernetes)
- Experience with **Azure SQL**, **RDS**, and **SQL Server**
- Network and security: **VNETs**, VPN S2S, **Route Tables**, Bastion, NSGs
- Integration with **Azure Active Directory** and identity tools
- Experience with **Nginx**, **HAProxy**, **Traefik**, **Zabbix**, **Datadog**, **SMTP relays**, **Keda, Karpenter, Istio, Envoy** ,etc.
- **Docker** and container orchestration for scalable microservices. Kafka and event-driven services.
- CI/CD with **Azure DevOps**, **GitHub Actions**, **GitLab**, **Jenkins**, **Tekton**, and **Bamboo. ArgoCD.**
- **SIEM and ISO 27001** integration.
- Fluent in English; collaboration across European (Germany, Austria, Sweden) and North American projects
